Subject: FW: Heads Up: Upcoming GenX Meeting between NC officials and Chemours on Thursday
Attachments: Sun et al. GenX in the Cape Fear River 2016.pdf

Please see message from Maria below.

In case anyone doesn't have it yet, I have attached the ORD study (that Laurence alerted me to) that shows 0.6 ppb average levels of Genx in the cape fear river.

The authors calculate based on flow that there must be a source of 5.9 kg/day mean to the river. The 6 month monitoring study was at a drinking water treatment plant downstream from an industrial site.

FYI

Also, ayou all know GenX is on the agenda for tomorrow's DDs mtg.
Agenda items for GenX will be

- 1) CDR production volume compared to production volume assessed as part of the PMN review
- 2) Timing on updating the risk assessment
- 3) Should the pended testing be revisited if the consent order is reopened?
- 4) Next steps

Subject: Upcoming GenX meeting

All,

Chemours will be meeting with local officials to discuss the GenX situation on Thursday, June 15 at the New Hanover County Government Center. (See story link below). There will be a media pool reporter in attendance, and also a scheduled post-meeting press conference. The meeting is private and not open to the public.

Cheryl and John – safe to assume EPA may get more questions following the event.
